Shaping the energy transition

For more than three decades, HUSUM WIND has been a driving force and trusted partner to the wind industry. With its clear focus on practical relevance, innovation, and exchange, it has developed into the leading platform for renewable energy in the German-speaking market. Expert forums, networking formats, and the WINDCareer job fair create added value beyond the exhibition itself. As an established meeting place for political, economic, and association decision-makers, the trade fair plays a decisive role in shaping the energy policy debate.

Join us from 14–17 September 2027 when the industry meets in Husum.

The driving forces behind renewable energy – innovation across all sectors

- › Plant manufacturing and energy generation
- › Planning, logistics, and operations
- › Service and maintenance
- › Green hydrogen
- › Sector coupling
- › Recycling and repurposing
- › Digitalization, cyber security, artificial intelligence
- › Energy supply and grid operation
- › Financing, insurance, and consulting
- › Research and development
- › Energy storage / battery storage
- › Community energy

- › Media package
- › On arrival and daily cleaning
- › AUMA fee, waste disposal, and energy cost allocation flat rate
- › Parking and exhibitor passes (2 each)

Shell scheme 9-24 sqm
› from € 510,-
Price per sqm

Digital+ Area

The One-Stop Shop for Digital Solutions in Wind Energy

Following its successful launch in 2025, the Digital+ Area will once again serve as a central platform for digital innovation at HUSUM WIND 2027. Exhibitors are given the opportunity to present products and solutions in the fields of digitalization, artificial intelligence, and cyber security directly to a highly qualified professional audience.

At the heart of the **Digital+ Area** is a central marketplace with an integrated forum, combining networking, expert presentations, panel discussions, workshops, guided tours, and roundtable formats. The concept is further enhanced by new networking highlights and a planned Digital+ Area Party.

Take advantage of this special opportunity to position your company prominently within a rapidly growing field, establish valuable connections, and increase your visibility. For Husum Wind 2027, the Digital+ Area will be given even more prominent placement and stronger promotion, underlining its growing importance for the industry.

Green hydrogen

Energy source of the future

Northern Germany is a role model for a green hydrogen economy, with numerous pilot projects underway. Due to its central importance for the future, green hydrogen will once again be an integral part and focus of HUSUM WIND 2027.

With a dedicated **Hydrogen Area** in Hall 5, we have been creating a platform for years and offering first-class B2B networking opportunities.

WINDCareer

The job fair at the must-attend event of the year

There has never been a greater demand for skilled workers in the wind and renewable energy industry. Due to the strong growth of the industry, companies are looking for qualified young talent from a wide range of disciplines more than ever before.

WINDCareer will once again take place on two days of the exhibition in 2027. Take this opportunity to present yourself and your company as an employer – not only to experienced professionals, but also to career changers and young talents.

Expertise from the industry

A top-class lecture programme will take place in our specialist forums on all four days of the trade fair. Experts from the industry and wind associations will organise lectures, conferences, panel discussions and forums. Register now and join us as a speaker.
